

abrdn Evolve Asia Pacific ex-Japan Equity Index Fund

N Accumulation GBP

31 August 2025

Objective

To generate growth over the long term (5 years or more) by tracking the return of the MSCI AC Asia Pacific ex-Japan Select ESG Climate Solutions Target Index.

Performance Target: To match the return of the MSCI AC Asia Pacific ex-Japan Select ESG Climate Solutions Target Index (before charges). There is no certainty or promise that the Performance Target will be achieved. The MSCI AC Asia Pacific ex-Japan Select ESG Climate Solutions Target Index (the "Index") is a representative index of the collective stock markets of Asia Pacific (excluding Japan), which excludes companies which are involved in certain activities.

Portfolio Securities

- The fund will invest at least 90% in equities (company shares) that make up the Index.
- The fund may also invest in other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly. These investments may not comply with the abrdn Evolve Asia Pacific ex-Japan Equity Index Investment Approach ("Sustainable Approach") applied by the Index, as described under 'Management Process'.

Due to the share class having been launched within the past year and consequently having a performance track record of less than 12 months, the share class performance cannot currently be shown.

Risk and reward profile

This indicator reflects the volatility of the fund's share price over the last five years. See Key Investor Information Document (KIID) for details.

Key risks

- (a) The value of investments and the income from them can fall and investors may get back less than the amount invested
- (b) Tracking Error Risk - The fund may not perform fully in-line with the index which it is tracking because of factors which may include transaction costs, timing and holding mismatching, or in the event of extreme market disruption.
- (c) Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.

Management process

- The management team aims to replicate performance of the Index in deciding which investments are to be included in the portfolio (passive management) and the number and weightings of investments may vary.
- Due to the nature of the passive management process, the fund's performance deviation from the Index is expected to be minimal.
- The Index is composed of a subset of equities within the MSCI AC Asia Pacific ex Japan Index (the "Parent Index"). The Index incorporates material sustainability targets relative to the Parent Index by applying higher weights to constituent companies with stronger environmental, social and governance ("ESG") scores, lower carbon footprints and a higher exposure to revenues from Clean Technology Solutions.
- In addition a set of company exclusions are applied which are related to controversial weapons, coal, tobacco, and very severe controversies.
- For full details of the sustainability targets and exclusionary criteria, please refer to the fund Prospectus.

- (d) Emerging Markets Risk - The fund may invest in emerging markets, where political, economic, legal and regulatory systems are less developed. As a result, investing in emerging markets may involve higher volatility and a greater risk of loss than investing in developed markets. In particular, where the fund invests in Variable Interest Entity (VIE) structures to gain exposure to industries with foreign ownership restrictions or invests in Chinese assets via Stock Connect / Bond Connect, there are additional operational risks, which are outlined in the prospectus.
- (e) ESG Investment Risk - Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in assets which similar funds do not (and thus perform differently) and which may not align with the personal views of any individual investor.
- (f) Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

Risk stats

Derivative usage

- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.
- Where derivatives are used, this would typically be to maintain allocations to equities while meeting cash inflows or outflows. Where these are large relative to the size of the fund, derivative usage may be significant for limited periods of time.
- The fund may use derivatives which do not comply with the Sustainable Approach applied by the Index.

To help you understand this fund and for a full explanation of risks and the overall risk profile of this fund and the shareclasses within it, please refer to the Key Investor Information Documents and Prospectus which are available on our website www.aberdeeninvestments.com The Prospectus also contains a glossary of key terms used in this document.

¹The Ongoing Charge Figure (OCF), is the overall cost shown as a percentage of the value of the assets of the Fund. It is made up of the Annual Management Charge (AMC) of 0.07% and other charges.
