

# abrdn Global Infrastructure Income Fund

NYSE: ASGI

## April 2026 Performance Data and Portfolio Composition

### Objective

The Fund's investment objective is to seek to provide a high level of total return with an emphasis on current income.

### Performance

The latest available performance figures have been calculated net-of-fees in U.S. dollars for the period:

### Cumulative and annualised total return as of April 30, 2026 (%)

	1 month	3 months	Year to date	1 year	3 years (p.a.)	5 years (p.a.)	10 years (p.a.)	Since inception (p.a.)
NAV	2.43	6.55	11.69	25.66	14.42	10.12	n/a	12.10
Market Price	8.05	7.37	11.20	42.97	23.21	14.08	n/a	12.93
S&P Global Infrastructure Index (Net TR)	2.70	5.72	11.03	24.72	15.24	10.96	n/a	12.77

Past performance is no guarantee of future results. Investment returns and principal value will fluctuate and shares, when sold, may be worth more or less than original cost. Current performance may be lower or higher than the performance data quoted. NAV return data includes investment management fees, custodial charges and administrative fees (such as Director and legal fees) and assumes the reinvestment of all distributions. The Fund is subject to investment risk, including the possible loss of principal. Returns for periods less than one year are not annualized.

#### Important risk disclosure

All performance shown is historical, assumes reinvestment of all dividends and capital gain distributions and does not guarantee future results. Investment return and principal value fluctuate with changing market conditions so when sold, shares may be worth more or less than that of the original cost. Total return based on market price reflects changes in market value. Total return based on net asset value reflects changes in the fund's net asset value during each period. Current performance may be lower or higher than the performance data quoted. This commentary is for informational purposes only, and is not intended as an offer or recommendation with respect to the purchase or sale of any security, option, future or other derivatives in such securities.

Closed-end funds are traded on the secondary market through one of the stock exchanges. The Fund's investment return and principal value will fluctuate so that an investor's shares may be worth more or less than the original cost. Shares of closed-end funds may trade above (a premium) or below (a discount) the net asset value (NAV) of the Fund. The net asset value (NAV) is the value of an entity's assets less the value of its liabilities. The market price is the current price at which an asset can be bought or sold. There is no assurance that the Fund will achieve its investment objective. Past performance does not guarantee future results.

The information presented was prepared and issued by the Fund based on publicly available information, internally developed data and other sources believed to be reliable. All reasonable care has been taken to ensure accuracy.

Investment involves risk. The value of investments, and the income from them, can go down as well as up and an investor may get back less than the amount invested. Past performance is not a guide to future results.

International investing entails special risk considerations, including currency fluctuations, lower liquidity, economic and political risks, and differences in accounting methods; these risks are generally heightened for emerging market investments. Equity stocks of small and mid-cap companies carry greater risk, and more volatility than equity stocks of larger, more established companies. Dividends are not guaranteed and a company's future ability to pay dividends may be limited.

Infrastructure-related issuers may be subject to a variety of factors that may adversely affect their business or operations, including high interest costs in connection with capital construction programs, high leverage, costs associated with environmental and other regulations, the effects of economic slowdown, surplus capacity, increased competition from other providers of services, uncertainties concerning the availability of fuel at reasonable prices, the effects of energy conservation policies and other factors.

The Fund's investments in private companies may be subject to higher risk than investments in securities of public companies. Please read and carefully consider the full description of risks set forth in the Fund's prospectus.

Please see the Fund's most recent annual report for more information on risks applicable to the Fund.
